What It Is

Short elevator pitch of the Signals Protocol: purpose, target users, and the core interaction.

Why It Matters

Key motivation, constraints, and the specific edge cases we need to solve. Focus on what is novel or risky.

How It Works

- Data plane: brief on message flow and integrity.
- Control plane: coordination, membership, upgrades.
- Safety: fault domains, adversary model, and mitigation.

Next Steps

Immediate research or engineering tasks, decision checkpoints, and dependencies.
